DESCRIZIONE
DESCRIPTION

Quando la bobina è eccitata, la valvola blocca il passaggio da 2 a 1. In questo modo, il flusso da 1 a 2 è consentito quando la pressione supera la forza del solenoide. Quando la bobina è diseccitata, la SVCP consente il flusso libero sia da 2 a 1 che da 1 a 2.

When the coil is e-energized, the SVM0.S08 allows flow from 2 to 1, and from 1 to 2. When the coil is energized the valve closes, blocking flow from 2 to 1. In this mode, flow from 1 to 2 is allowed once the pressure overcomes the force of the solenoid.
